RE: Comments on Diablo Canyon Decommissioning – Draft Environmental Impact Report (“DEIR”)

Dear Ms. Strachan:

Thank you for the opportunity to comment on the above-referenced report regarding the proposed decommissioning of the Diablo Canyon Nuclear Power Plant near Avila Beach. We greatly appreciate your efforts to include Coastal Commission staff as part of the interagency consultation the County provided during preparation of the DEIR. As a result of our involvement in that effort, we have no substantive comments at this time; however, we will continue evaluating the proposed project through our review of comments you receive on the DEIR, the County’s response to those comments in a Final Environmental Impact Report, and during the County and Coastal Commission review of coastal development permit applications once they are submitted by the project applicant, Pacific Gas & Electric Company.

We expect our continuing evaluation of the proposed project will be informed by the comments received and by the continuing public involvement provided by these upcoming review processes. Again, thank you for involving us in the review conducted to date and we look forward to continuing our involvement in the important consideration of this proposed project.

Sincerely,

Tom Luster
