Public Parcels in Municipalities that Meet Minimum Screening Requirements

On the following maps covering the municipalities of San Luis Obispo County, blue polygons identify the public parcels that meet the criteria for Regional- and Neighborhood-scale CIPs (public land; any NLCD category except 22, 23, 24; within WMZ 1, 2, 4, 5, 8; slope <10%; acres > 0.25). The red dots identify the public parcels that meet the criteria for parcel-scale LID treatments (public land, acres <0.25; too small to outline at map scale). Tables of the parcels displayed on these maps are provided on the pages following the map sheets.
Prospective Regional- and Neighborhood-Scale CIP parcels within municipalities. Those that are also located in the high-priority Planning Watersheds (see Figure 4-4), reflecting the highest combination of potential need and opportunity, are highlighted and appear at the top of this table.

APPENDIX 4-G

Potential and Identified Green Streets
The following maps identify streets that meet basic criteria for Green Street retrofitting (minor or other arterial, near or adjacent to commercial land uses, less than 10% hillside gradient). For three municipalities that have already explored these opportunities in detail (Morro Bay, San Luis Obispo, and Paso Robles), specific segments are highlighted on their respective map. Also included is a table that lists all of the mapped road segments.
