AGENDA	ITEM	LEAD
Call to Order 1025	<ul style="list-style-type: none"> Introductions Public Comment – No public comment 	Dr. Stefan Teitge
Summary Notes	No Additions – Dr. Teitge motions, D. Burkey 2nds, Finalized	
Discussion	<p>Review and Approval of Draft Procedure #710 Vascular Access and Monitoring:</p> <ul style="list-style-type: none"> • Currently, SLO County ALS providers are unable to utilize PVAD. • Additions to procedure include routine access for medication/fluid; access to tunneled and non-tunneled central lines via base order; access procedure; considerations for providers for IV/IO access; humoral IO placement available via base orders. <p>Discussion</p> <p>Dr. Ronay – From paramedic perspective, they have little experience with wide variety of access lines. IV access is the best method for administration.</p> <p>D. Goss – Would there be any procedure change based on the type of line?</p> <p>D. Burkey – No, there is not much variation for accessing lines. Will medics be able to utilize an already accessed port? - only if there is a lure lock system can the line be accessed.</p> <p>Dr. Teitge – Dialysis ports are very finicky and would need input from an IR or surgeon before accessing.</p> <p>D. Goss – The timeline for this procedure is to move to approval at EMCC in time for training in May.</p> <p>Dr. Teitge – The IO system makes a lot of sense and is much easier and more effective than IV.</p>	David Goss

Adjourned – 1120	Next meeting date – Thursday, February 16th, 2023, 1015 a.m.
