PPE and COVID-19 Test Distribution for Outbreak Response Ends Dec. 31

Submit orders before the new year

The Public Health Department will no longer be supplying Personal Protective Equipment (PPE) or COVID-19 antigen tests for respiratory illness outbreak responses after December 31, 2025. We appreciate this partnership and thank you for your participation the past few years.

We encourage you to submit orders now to equip your facility while supplies last. Please complete our [Respiratory Virus Outbreak Supply Request Form](#) available at slocounty.ca.gov/CongregateFacilities under "Response Testing".

Current supply includes:

- PPE (gloves, gowns, face shields, N95 masks, and surgical masks)
- Limited number of antigen tests (a small quantity of combination COVID-19/flu antigen tests remain; small facilities are encouraged to request these tests while supplies last).

Please ensure you are prepared for future outbreaks and obtain PPE and tests from other sources.

To report an outbreak of COVID-19 or another respiratory illness at your facility, please use this online form: www.slocounty.ca.gov/congregatelinelist. Our team remains available to answer questions and provide guidance during an outbreak response. To contact our team, call 805-781-5500 and ask to speak to the nurse on call.
