WEEKLY REPORT OF ENVIRONMENTAL DOCUMENTS AVAILABLE FOR REVIEW (“Courtesy Notice”)

The purpose of the environmental review process is to provide information about the environmental effects of the actions and decisions made by the County, so that these considerations become a part of the decision-making process. The following is a summary of the most recent determinations made by the County's Environmental Coordinator; these weekly Courtesy Notices can be viewed online at [Courtesy Notices, Weekly -- Summary Listing of Environmental Documents Available for Review - County of San Luis Obispo](#). The purpose of this listing is to notify the public of pending actions, which may affect the environment of San Luis Obispo County. You are invited to participate in this process by reviewing and providing comments on the recommendations of the Environmental Coordinator. Your comments should be addressed to the Environmental Coordinator (address at end of document). For more information about the environmental review process, please visit: [Environmental Review - County of San Luis Obispo](#) .

For the week of February 22, 2026

1. Mitigated Negative Declaration (Public Works)

Huasna Townsite Road Bridge Replacement Project, 300678/ ED25-0275
SCH Number: [2026020855](#)

The County of San Luis Obispo (County) Public Works Department, with funding from the Federal Highway Administration (FHWA) and oversight by the California Department of Transportation (Caltrans), proposes to replace the existing, temporary steel truss bridge on Huasna Townsite Road over Huasna River (RD-1071-BR1). The Huasna Townsite Road Bridge Replacement Project (project) is located on Huasna Townsite Road approximately eleven miles east of the City of Arroyo Grande. The purpose of this project is to provide a permanent concrete bridge to replace the temporary steel truss bridge installed after winter storms in January 2023 destroyed the original timber bridge. The project footprint consists of an approximate 2.23-acre area and contains the right-of-way for the proposed project, all areas of ground disturbance, and potential staging areas. Staging is proposed on Huasna Townsite Road, within County right-of-way, and within adjacent fields that have been previously disturbed by grading and would not require improvements (e.g., grading, leveling). The existing temporary steel truss bridge, approximately 180 feet long and 13.58 feet wide, will remain in place during construction to facilitate continued public access throughout the project. The proposed replacement structure will be an approximately 202-foot-long, 23.5-foot-wide, two-span, cast-in-place (CIP)/post-tensioned (PT) concrete box girder bridge located approximately 35 feet north of the existing roadway centerline, parallel to the temporary bridge. The proposed replacement structure would be designed to current design standards.

Additional project information can be found at:
