22.10.130 – Residential Density.

...

- C. **Multi-family dwellings.** The number of multi-family dwellings allowed on a single lot or adjoining lots is based upon the "intensity factor" of the site. The intensity factor will be either low, medium, or high, based upon the type of street serving the site and the sewer service provided. The intensity factor determines the minimum and maximum number of units allowed, the maximum floor area for all units in the project, and minimum areas for landscaping and pedestrian use. A multi-family dwelling project must satisfy the floor area and open area standards of this Section, as well as all applicable requirements for parking, setbacks and height. Multi-family dwellings in the Recreation Category are subject to Section 22.30.500 (Residential Uses in the Recreation Land Use Category). Multi-family dwellings in the Commercial Service, Commercial Retail, or Office and Professional land use categories are subject to Section 22.30.490 (Residential Uses in Office or Commercial Land Use Categories).

1. **Determining intensity factor.** The intensity factor is the lowest obtained from any of the following criteria:

Criteria		Intensity Factor		
		Low	Medium	High
Type of road access	Unpaved road	✓		
	Paved local street		✓	
	Paved collector or arterial (1)			✓
Sewer service	On-site septic	✓		
	Community sewer			✓

Notes:

- (1) Site access may be from a cross street where the site abuts a collector or arterial.

2. **Determining allowable density.** The allowable density, maximum floor area and minimum open area for a multiple-family project shall be shown in the following table (all area figures are expressed as percentages of the total usable site area). A minimum of 6,000 square feet of site area is required to establish more than one dwelling unit, in compliance with Section 22.10.110.C (Minimum Site Area - Multi-Family Dwellings):

Intensity Factor	Minimum number of units per acre	Maximum number of units per acre	Maximum floor area (1)	Minimum open area (2)
Low	10	15	55%	40%
Medium	16	30	75%	30%
High	27	42	100%	25%

Notes:

- (1) The gross floor area of all residential structures, including upper stories, but not garages and carports.
- (2) Includes required setbacks, and all areas of the site except buildings and parking spaces.

...

SECTION 6. County Code Section 22.10.140 is hereby amended as follows:

22.10.140 – Setbacks.

...

- D. **Front setbacks.** The front setback is established parallel or concentric to the front property line. Front setback landscape and fencing standards are in Chapter 22.16, and Section 22.10.080, respectively.

...

2. **Residential uses.** All residential uses except for second-story dwellings over a commercial or office use shall have a minimum front setback of 25 feet, except as follows:

...

3. **Commercial and office land use categories.** No front setbacks are required within a central business district; a 10-foot front setback is required in Commercial and Office categories elsewhere. Ground-floor residential uses in Commercial and Office categories are subject to the setback requirements of Subsection D.2
4. **Industrial land use category.** A minimum 25-foot front setback is required except on interior and flag lots, where the front setback shall be the same as that required for side setbacks by Subsection E.
5. **Recreation land use category.** A minimum 10-foot front setback is required, provided that residential uses are subject to the setback requirements of Subsection D.2.

...

- E. **Side setbacks.** The side setback is measured at right angles to the side property line to form a setback line parallel to the side property line, which extends between the front and rear setback areas.

...

5. **Office and Professional land use category.** Side setbacks shall be provided as set forth in Subsection E.4, except within a central business district no side setback is required.

6. **Residential Multi-Family land use category.** For sites of one acre or larger, the side setback shall be a minimum of 10 feet.

7. **Side setbacks for special development types.**

...

F. **Rear setbacks.** The rear setback is measured at right angles to the rear property line to form a setback line parallel to the rear property line.
