

Town Hall Meeting

Topic: Our WATER

and Hydraulic Fracturing.

*Caldomars Rising Up
Against Fracking*

Tuesday, April 16, 7-9pm, Grange Hall, Broad Street, San Luis Obispo.

Every thriving, prosperous community depends on a clean, uninterrupted supply of water for its livelihood. That's a fact.

Every Hydraulic Fracturing operation depends on that same clean water supply for its livelihood. That's a fact.

What will be disclosed and discussed are the facts presented by Doug Shields, former Pittsburgh City Council member, faced with the same dilemma of having to share their precious, limited, priceless, nonrenewable water resources with their new neighbor, Halliburton.

Anyone that uses water on a regular basis will want to come to this meeting to see what our future holds and what our options are. Answering questions, concerns is what this is all about.

Key Note Speaker: Doug Shields, Pittsburgh City Council wrote the first rights-based ban fracking ordinance in the nation. Ben Price, CELDF, Local speakers TBA, Supporting organizations, Global Exchange, Food and Water Watch, Center for Biological Diversity, David Suzuki Foundation, SLO County Transition Towns, Rootamental Brand.
