Project Information

Preliminary entitlements- Subdivision or Land Use Permit approval	Final- Building and/or Grading Permit for construction
Land Use Permit Number(s):	Building Permit Number(s):
Project Address:	Assessor's Parcel Number (APN):
Brief narrative description of project:	

Impervious Surface Areas

Calculate and identify all items listed in the table below.

Total Existing Impervious Area (square feet): Existing buildings, pavement, etc. within project area	
New Impervious Area (square feet): Example: New buildings, new pavement, etc.	
Replaced Impervious Area (square feet): Example: Buildings demolished to build a new parking lot or vice versa	
Reduced Impervious Area (square feet): Example: Pavement/buildings demolished with area scarified, re-vegetated, replaced with pervious pavers, etc.	
Credit for Reduced Impervious Area (square feet): If [New + Replaced] > Total Existing , use Credit = 0 If (New + Replaced) < Total Existing , use Credit = Reduced	
Net Impervious Area (square feet) = (New + Replaced) - Credit	

STORMWATER CONTROL PLAN APPLICATION

Stormwater Performance Requirements

The following table summarizes the mandatory Performance Requirements based on the amount of impervious surface area that is created or replaced. Please review this table to determine which requirements apply to the project.

Net Impervious Surface square feet	Performance Requirements			
	Performance Requirement #1	Performance Requirement #2	Performance Requirement #3	Performance Requirement #4
0 - 2,499	Complete Stormwater PCR Waiver Request Form			
2,500 - 4,999	✓			
5,000 - 14,999	✓	✓ *		
15,000 - 22,499	✓	✓	✓	
≥ 22,500	✓	✓	✓	✓

* Not applicable for a single-family residence

Check the applicable performance requirements and indicate whether the project meets the requirement:

Performance Requirement #1- Site Design	Requirement met? <input type="checkbox"/> Yes <input type="checkbox"/> No
<i>(Projects that meet Performance Requirement 1 only, complete this SWCP application and attach any applicable exhibits)</i>	
Performance Requirement #2- Water Quality Treatment	Requirement met? <input type="checkbox"/> Yes <input type="checkbox"/> No
Performance Requirement #3- Runoff Retention	Requirement met? <input type="checkbox"/> Yes <input type="checkbox"/> No
Performance Requirement #4- Peak Management	Requirement met? <input type="checkbox"/> Yes <input type="checkbox"/> No

- **Projects that create or replace less than 2,500 square feet of impervious surface area must complete and submit the Stormwater PCR Waiver Request Form.**
- **Projects required to meet Performance Requirement 1 only, must complete this SWCP application and attach any applicable exhibits.**
- **Projects required to meet Performance Requirement 2, 3, or 4, must submit this SWCP application in addition to a complete Stormwater Control Plan using the County provided template.**

STORMWATER CONTROL PLAN APPLICATION

Performance Requirement #1: Site Design Measures Applicants Can Incorporate to Reduce Stormwater Impacts

Applicants are encouraged to reduce stormwater impacts associated with development and redevelopment.

<i>Performance Requirement 1: Site Design and Runoff Reduction Summary</i> Minimize stormwater runoff by implementing <u>one or more</u> of the following Site Design Measures. <i>Selected Design Measures must be clearly referenced on the project plans.</i>			
Site Design Measures	Implemented?	If Yes, provide Plan Sheet / Detail location	If No, provide an explanation below
Roof runoff directed into cisterns or rain barrels for reuse?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Roof runoff directed into vegetated areas (safely away from building foundations and footings)?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Runoff from sidewalks, walkways, and/or patios directed onto vegetated areas (safely away from the building foundations and footings)?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Runoff from driveways and/or uncovered parking lots onto vegetated areas (safely away from the building foundations and footings)?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Are bike lanes, driveways, uncovered parking lots, sidewalks, walkways, and patios constructed with permeable surfaces?	<input type="checkbox"/> Yes <input type="checkbox"/> No		

Performance Requirement #1: Stormwater Site Design & Runoff Reduction Summary

For each of the following, please describe how this project has complied to the maximum extent practicable with the following site design and runoff reduction:

1. Limit disturbance of creeks and natural drainage features.

STORMWATER CONTROL PLAN APPLICATION

2. Minimize compaction of highly permeable soils.

3. Limit clearing and grading of native vegetation at the site to the minimum area needed to build the project, allow access, and provide fire protection.

4. Minimize impervious surfaces by concentrating improvements on the least-sensitive portions of the site, while leaving the remaining land in a natural, undisturbed state.

Certification*

I hereby certify that this project is designed to achieve full compliance with each of the applicable Central Coast Post-Construction Requirements.

Preparer Name:	
Preparer Signature:	Date:
Was this application completed by a registered professional? <input type="checkbox"/> Yes <input type="checkbox"/> No	
License Number:	License Type:
Stamp:	

*Certification is required for projects subject to Performance Requirements 2, 3, or 4 and may be provided by a registered professional engineer, geologist, architect, and/or landscape architect.
