Place an "x" on the table documenting the temperature and initial at the bottom of the table. Record action taken at the bottom of this page if the temperature recorded is in the GREY area.

NOTE: All refrigerators have a defrost cycle. Durin this time, the temperature is higher than usual. If the temperature is not in the safe range, take the temperature 20 minutes later and record time/temp in the action line. If the temperature is still not in range upon second reading, notify Program Supervisor.

ACTION TAKEN IF TEMP IS OUT OF RANGE: SUPERVISOR CONTACTED/DATE/TIME
